

Simons Town Marina Company

Coming out onto the hard - tips and advice

- There are bays for 14 boats, **available to members or visitors.**
- The **Sling Lift** and **Office** only operate on weekdays, no weekends or public holidays.
- Come and see Haidi in the Marina office upstairs and fill in a Booking Form.
- Arrangements can also be made by phone or email.
- State your **Date out** and **Date in** requirements and details of your boat.
- Haidi will make out an invoice, which you need to **pay in advance.**
- Once that is sorted, Spilly will **confirm your date and** give you a **time.**
- At the appointed time, the Sling lift will be put into the water and you must bring your boat in.
- Have at least two people on board to help catch and cleat off the lines we will provide.
- If you have motor problems, a ferry tow can be arranged.
- We require any hull cleaning and high pressure washing to be done on the slip, so please organise this in **advance** with one of the sub-contractors if you are not doing it yourself.
- This must be done promptly so as not to hold up the sling lift, which might have another customer in line.
- We will place your boat on the hard and set the necessary stands and props.
- If it looks like you are going to have to extend your stay on the hard, remember that the rate **escalates the longer you stay.**

Below are details of the sub-contractors available on the hard. It is up to you to make your own arrangements with them.
